WE CREATE ELEGANTLY
 CASUAL INTERIORS.

JINX & MINKA McDONALD

Jinx McDonald and her daughter, Minka, have a joyful, dynamic relationship, so it's not surprising their energy translates into creating the kind of interior designs people love living in.

In fact, they recently won five coveted Sand Dollar Awards for their fresh casual-meets-elegant interiors.

Yet for Minka and Jinx, the real reward comes from combining their approaches with the talents of their licensed designers and design associates to create unpretentious, gorgeous and liveable environments.

"Interior design is important and a huge investment, but we try to keep the joy in it and create relaxed, but beautiful and elegant spaces," says Minka, who is LEED 'green building' certified.

For Jinx, that means making the most of working alongside one of the closest people in her life. While Jinx founded her company in 2000, Minka joined five years ago.

"We're on the same wavelength, sharing the same thoughts and background. And we learn from each other. We're really a great team."
